About Ua Floors...

Since founded in 1992, Ua Floors' philosophy is built on providing quality and healthy products to our customers. We meticulously offer environmentally friendly material, and produce our flooring with eco-friendly manufacturing practices. And our products meet the most stringent CARB II ultra-low formaldehyde emission standard.

NOT JUST WOOD FLOORS

Armed with the latest techniques in wood and surface treatment, Ua Floors developed and patented "Far-Infrared Ray"(FIR) technology in wood flooring.

Far-infrared rays energy improves blood microcirculation and metabolism while strengthening immuno-competence for lowering risk of cardiovascular disease.

When in contact with a Ua Floor that has Far-Infrared Ray technology, the FIR causes a resonance with the water molecules. It ionizes and activates the water molecules in the cells and blood, thus improving the blood circulation.

Before

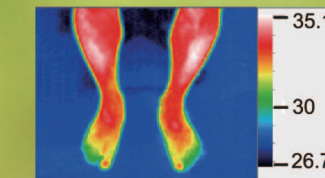

The blood vessel is thin, flow speed is low, and color is slightly reddish.

After 30 seconds

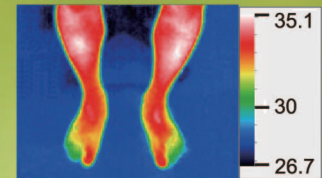

The vessel expands to be thicker and the flow speed is faster showing improved capillary blood circulation.

Before

Capillary blood circulation is slightly slow and the body temperature is lower.

After 30 minutes

The temperature of toes and shanks are higher compared to the original states.

Diamond Forever - ecological and durable -

The wear resistant Diamond Forever series was developed based on our philosophy that a product should be both ecological and durable.

We developed Diamond Forever to withstand compression resistance up to 3,278 PSI to increase the durability, performance and prolonged life of our hardwood flooring and to support active lifestyles.

Dimensions:
13/32"(10.5mm)thickness X 5"(125mm)width x random length(1'~5')

- 1 Multiple-layer scratch resistant UV coating
- 2 2mm solid hardwood wear layer
- 3 9mm solid birch exterior grade plywood

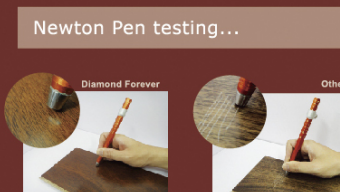

Protect your home forever...

The Diamond finishing is so durable that it passes the Taber abrasion test at 50,000 cycles. Diamond Forever offers a limited "Lifetime Residential" and "10-year Commercial" wear through finish warranty and a "Lifetime" delamination warranty for both residential and commercial applications.

By choosing Diamond Forever, your lifetime costs will be reduced by not having to replace or repair the flooring as frequently as other wood flooring. See our website for the complete warranty.

The taber abrasion test is performed based on ASTM D4060-01. Test is carried with Taber Wheel CS-17 and with 500g weight load. The finish is not worn through after 50,000 cycles.

Diamond Forever finish remains unaffected than others.

Others shows damage penetrating through the finished surface.
