About Ua Floors

Founded in 1992 with an emphasis on health, quality and environmental friendly manufacturing practices, Ua adheres to this philosophy and provides its customers with nothing less ever since. We meticulously choose from sustainable materials and produce with minimum waste, without compromising on the quality of our products and caring about our customers' health. Our flooring complies with CARB II and E1, the most stringent volatile organic compound (VOC) emission standards and to boost your health further we apply FIR Energy coating to our products.

About Taiwan Acacia

Taiwan small leaf Acacia is an endemic species available in Taiwan. Sharing similar characteristics as Hawaiian Koa, Taiwan Acacia is rich of colors and has distinctive grains because of the unique island environment and humidity. While Hawaiian Koa is known for its use in buildings of the royal families and valuable guitar, Taiwan Acacia is widely used in engineered wood flooring for its high stability and hardness.

High Hardness

- ▶ Harder than Santos Mahogany.
- ▶ Taiwan Acacia has a Janka hardness of 2676 lbs (Other species' Acacia ranges from 1170 to 2345 lbs)

Strong Carbon Sequestration Capacity

- ▶ Taiwan Acacia 363kg/m³ (compared to European oak's 317kg/m³)

Non-toxic, Energy, Health, Green Lifestyle!

Bring the goodness of nature into your home!

Certified quality

Our eco-friendly plywood is non-toxic and meets the ultra-low formaldehyde emission standard CARB II and the European E1 standard.

Safe and healthy environment for kids

Nano-bacteriostatic technology in our floorings' coating with its proven resistance to bacteria helps to provide a safe and healthy environment for your children and you.

Far Infrared Energy Flooring - Not just wood flooring

Far Infrared Rays, also known as biogenetic rays are part of the invisible sunlight spectrum. They promote health and growth of living cells, in plants, animals and human beings.

The human body contains more than 60% water by weight. When skin comes in contact with Ua Far Infrared (FIR) Energy Flooring, the FIR energy causes a resonance that ionizes and activates the water molecules in our body's cells and blood, thus improving blood circulation.

Images taken with a 360x microscope to compare microvascular blood circulation before and after direct skin contact with Ua Floors' Far Infrared Energy coated flooring.

Body warmth development when standing on Ua FIR Energy Flooring taken with a thermal imaging camera.
